PROJECTS - https://sshuman95.github.io/motion_portfolio/

KJPresley Designs, Glen Allen, VA — kjpresleydesigns.com

- Analyzed requirements and designed, developed and implemented software applications for an intuitive, customer focused site.
- Used programming capabilities in React, Firebase, HTML, CSS, JS, Node, Express and other libraries as needed to create an E-commerce application.
- Programmed admin portal that tracks status of orders and allows the end user to easily create, update, and delete items from the store.

- Integrated Stripe API to allow easy and secure transactions.
- Established web hosting for the site and uploaded site files to the hosting account.
- Created restful API to capture user data and display reports stored in a Firebase database.

Home History, Glen Allen, VA —homehistory.org

- Created eye catching and functional digital design concepts across various platforms to strengthen company brand and identity.
- Used programming capabilities in React, Firebase, HTML, CSS, JS, Node, Express and other libraries as needed.
- Established web hosting for the site and uploaded site files to the hosting account.
- Kept abreast of emerging technologies, software and trends and project applications.
- JSON data is queried and mapped when a user searches for an address.
- Employed Google Autocomplete address API to easily fetch data and keep queries consistent throughout the app.
